I agree. Unless I hear any other issues or concerns, I was going to get an email out to the Region now so we can get them on the same page sooner rather than later.....

Yes, we should publish our FY15 “unfunded site” fact sheets on the web with our end of year accomplishments. I don’t see any reason to change the format from what was used last year (<http://www.epa.gov/superfund/accomp/factsheets14/holley.htm>). Does everyone agree?

One last question, do we intend to publish our annual “unfunded site” fact sheet on the web with our end of year FY15 accomplishments information? If so, should we use the same format for the fact sheets? I’d like to request the Regions to develop or update fact sheets for the three unfunded FY15 sites in the same message if we intend on publishing those again this year.

Richard,

We raised this topic at the communications meeting today. Jim is fine with the attached press release template. The mine site language was removed, as was the sentence you raised, below. We confirmed that using this template language/format is optional, but Jim likes the national SF program language we propose and thought we might “strongly suggest” that the regions use that section or something similar. I did not get the impression that they need to retract or change something that already went out.

Thanks

Melissa

Deliberative Process/Ex. 5

How do we go about getting this blessed by Jim/Don? Whatever the process, I'd like to try and get that done quickly so we can get this in the hands of the Regions as soon as possible. Some of them have already moved on this for their sites..... Also, my approach was to indicate to the Regions that this is optional language/format for them to use. Is that true? If we want to make them use it, are we going to ask for those that already issued statements to retract or update what has already been issued?

Richard,

I've taken a stab at adding 35th anniversary and "suggested generic disclaimer language" on mine site work, as you reference in your email, below. I'm sure Dana and Jim will want to take a look at the mine site work language before it is sent to the regions as suggested for a press release. If we have a communications meeting tomorrow, I will raise it with Jim. Otherwise, Suzanne and Dana can weigh in and then we can send it up to Jim. Because of GKM, this might also be something we need to run past OSWER once we settle on language?

Thanks

Melissa

Thanks so much Lois. Richard, before you send this out, let us look at these to add in something about the 35th anniversary.

Here you go—I also included language I drafted to be used in a note from jim to the DDs, encouraging them to issue RA funding press releases—maybe that will be helpful also.

Subject: RE: Press Release for FY15 New Start Sites

Jim would still like each region to be doing a press release and asked for us to provide them any generic languages or messages we want to suggest they include in those press releases. For the mining sites (Callahan Mine, Elizabeth Mine, Ore Knob) we were to include suggested generic disclaimer language on that site work that will take place at those sites and how that may or may not relate to the Agency mining site review efforts.

Any information/language on these areas would be appreciated. As of right now, the Regions are under the impression that they are on their own for doing press releases so the sooner we can give them some feedback on what we may want them to include from a messaging standpoint, the better. Thanks....

Richard – the local paper near Ore Knob has already run a story on the project. Do we still need to issue a release?

From: Carr, Loften

To: Coleman, Kerisa; Young, Nestor; Rigger, Don
Subject: FW: Press Release for FY15 New Start Sites

All,

Here is a June 2015 article regarding funding the project thanks to a CAG member that gave me the article. We can issue a press release, however we are on the agenda with the Town of Jefferson Alderman (hopefully for a vote this time) next week Monday September 28. Should we wait and see what the outcome of the meeting is before we issue a press release?

Thanks,

Loften

I'm guessing it won't be too hard to get a little press in Ashe County although I'm not sure anybody reads that paper.

Cc: Monell, Carol; Dreyfus, Melissa G.; Gartner, Lois
Subject: Press Release for FY15 New Start Sites

Panel Members,

I've been asked to provide you a reminder that we are hoping each region that received new start funding will do a press release announcing the funding and initiation of work for those particular sites. As we work on the end of fiscal year summaries for FY15, we have the following sites as the new start projects that received funding in FY15 to initiate construction work:

R1	Durham Meadows
R1	Callahan Mine
R1	Elizabeth Mine
R2	Diaz Chemical
R2	Syncon Resins
R3	Sharon Steel Corp
R4	Ore Knob Mine
R5	Eagle Zinc Co (OU2)
R6	Jones Road Groundwater Plume
R7	Madison County Mine
R9	AMCO Chemical Corporation
R10	Northwest Pipe & Casing

Please let me know if you envision any problems with doing a press release for these sites.

Also, the three sites that will be identified as unfunded in FY15 include:

R2 Ellis Property Drum Dump

R2 Radiation Technology

R4 GMH Electronics

We will be in touch soon once we determine if we are going to do unfunded fact sheets for these three sites like we have done in previous years.

In the meantime, give me a call if you have any questions. Thanks.....
